

SENDERO

Italian Ryegrass

Profile

SENDERO is one of DSV's new promising diploid Italian ryegrass varieties. In addition to above-average yields, it is characterized by particularly good rust resistance, and high early growth development. This results from SENDERO being developed from a sward-selection of fusarium-resistant plants with high regeneration vigour. Furthermore, SENDERO is very digestible.

- outstanding early spring growth
- high digestible
- good rust resistance

Suitability

Ploidy	diploid

Other features

Hay	✓
Pasture	✓
Saline Tolerance	
Flood Tolerance	✓
Drought Tolerance
