

## AAC MEADOWVIEW

### ALFALFA

#### Acid Tolerant

#### Profile

Acid tolerant variety ideally suited for the foothills of AB and Peace region of AB and BC

AAC Meadowview was selected from plants bred in acidic conditions, ranging from a Ph. of 4.5 to 6.0. Yield increase over check varieties was 115% of the check over six years.

AAC Meadowview's winterhardiness and disease resistance should lead to a longer stand life, according to the Canadian Journal of Plant Sciences. AAC Meadowview is specifically adapted to areas of southwestern Alberta (foothills) and British Columbia, and other areas where soil pH is a major limiting factor for alfalfa production. This is the only alfalfa known that is specifically bred for acid tolerance.

AAC Meadowview was created in Western Canada, for Western Canada.

- ✓ Deep set crowns
- ✓ Erect spring growth habit
- ✓ Rapid regrowth after cutting

#### Resistance to diseases

Verticillium wilt

## Other features

<b>Root structure</b>	Branching, Tap
<b>Fall Dormancy</b>	2 (similar to Beaver)
<b>Winterhardiness</b>	Not Rated
<b>Crown</b>	Deep crown with medium width
<b>Regrowth</b>	Rapid regrowth after cutting
<b>Disease Index</b>	3.42
