

ALFALFA BLEND 10-5

ALFALFA

Adapted to Variable Conditions

Profile

Premium certified blend of five varieties with unique traits that enhance plant population across variable field conditions

- 30% Robust, 30% Haygrazer, 15% Response WT, 15% Rugged ST and 10% Sidewinder.
- Robust - Multi-leaf variety, selected for winter survivability, high forage yield and quality.
- Rugged ST - improved germination under salt stress than conventional varieties.
- Response WT - High production branch root that handles higher moisture.
- HayGrazer - Sunken crown with fibrous root and excellent traffic tolerance.
- Sidewinder - Creeping root with excellent yield and persistence under dryland conditions.

DSV Northstar has carefully selected alfalfa varieties that offer increased performance characteristics under our challenging growing conditions. By combining five elite alfalfas we have increased the overall adaptability without sacrificing yield. Each alfalfa has its own unique characteristic. The combination of these variety strengths with similar maturity truly delivers a unique forage growing opportunity for alfalfa growers.

- ✓ Contains tap, creeping, branch and fibrous root systems

Other features

Root structure	Creeping, Tap, Branch, Fibrous
Fall Dormancy	Mix of 2.0 - 4.0
Winterhardiness	Mix of 1.5 - 2.0
Alfalfa blend	Yes
Winterhardy	Yes
Disease resistance	Excellent
Regrowth	Very good
Hardiness	Excellent
